

U.S. DEPARTMENT OF
ENERGY

Risk Management Tools and Methods Users Group

This Site:

STATEMENT OF PURPOSE

Improve risk management on DOE projects through the use of processes, tools, and methods developed and shared within the DOE user community by:

- Voluntarily sharing user-developed-risk management tools and methods to reduce development costs, bring consistency, and improve upon the quality and application of risk management program for DOE projects and programs.
- Sharing information and techniques on use of commercially-available risk management tools to improve performance of these tools for DOE applications.
- Serving as the corporate source for information on risk tools and methods in DOE.

Membership:

DOE project and program risk management user community (federal and contractors engaged on DOE project and programs). General membership is open to all users. Members must be sponsored by their respective project or program for participation. The users group chairman is Leo Guillen (509 376-0254). The vice chair is Mike Shay, whose contact info is below.

CRR Tools and Other Links

In the upper right hand corner, is a box of links containing a site where one may download DOE's Centralized Risk Register tools (See related article in the Official Site Documents folder to the left). Also posted in the Links area are links to the DOE's OECM website and to relevant DOE guidance.

How to Get Access to the SharePoint Site:

Email the Site Administrator

SharePoint Site Contacts:

Site Administrator--Jennifer O'Malley
